TAKEBACK PROGRAM CONSUMER CONTACTS

8a. What Web site address do you provide to consumers for information on your takeback program? Our company works with MRM to provide electronics recycling in Michigan. MRM maintains a comprehensive recycling website at <http://www.mrmrecycling.com>. A specific page with information on MRM's program in Michigan is at: http://www.mrmrecycling.com/collection_mi.htm

8b. If provided, what telephone number do you provide to consumers for information on your takeback program? 1-888-769-0149

TAKEBACK PROGRAM INFORMATION

9. Please describe your takeback program.

MRM offers consumers nearly 70 collection sites located across the State of Michigan. Most of MRM's collection sites are at Goodwill stores; other MRM sites include regional retailers American TV and Paul's TV. MRM is in the process adding additional collection opportunities for consumers by supporting local government recycling programs, and will be adding more locations in 2011.

Consumers can go to the MRM website, click on the image of the State of Michigan and see a list of the collection locations available to drop off TVs for recycling

10. What information do you provide to consumers on how and where to return covered electronic devices that are labeled with your name or brand label?

Our company works with MRM to provide electronics recycling in Michigan. MRM provides consumers with information on how and where to return covered electronic devices on its website: www.mrmrecycling.com. This site has a map of the United States and consumers can find information on the MRM program in Michigan by clicking on the state of Michigan on the map.

The Michigan page on the MRM website lists all brands participating in the MRM program in Michigan. The MRM Mailback program for computer products provides a mailback option for consumers who want to recycle brands participating with MRM. The MRM take back locations provide collection locations for consumers who wish to recycle TVs. All brands of TVs are accepted at MRM at no charge to consumers at MRM recycling collection locations.

11. How do you provide information to consumers on how and where to return covered electronic devices?

Audiovox Electronics provides information on how and where to return CEDs through the MRM website and its associated toll-free numbers. In addition to the information on the MRM Electronics Take Back program provided on the Michigan page on the MRM website as described in Question 10 above, MRM links to the Michigan DNRE Electronics Takeback Program on this page. If consumers have questions about how and where to recycle in general or are seeking sites to recycle covered computers that are not labeled with our brand label, they can click on this link to find additional recycling information.

TAKEBACK PROGRAM REPORT (include this information beginning with the first registration submitted after the implementation of the takeback program)

12. The total weight of the covered electronic devices received by the takeback program from consumers during the prior year:

3,051.4 lbs or 1.53 Ts. Please note that this figure is the amount of electronics recycled to date in the first, partial program year in Michigan. The new Michigan Takeback program began April 1, 2010. This date represents CED collections received between April 1, 2010 and September 30, 2010.

Tons

13. The processes and methods used to recycle or reuse the covered electronic devices received from consumers:

In general, electronics recyclers first identify re-usable devices, if possible. Then the CEDs are dismantled into their major component parts and material types (e.g., printed circuit boards, plastics from housings, metal components, lighting, etc.). From there, they are sent to 2nd tier recycling facilities that use various processes to turn the components into salable commodities (e.g., plastic pellets, copper chips from chopping wire, smelting of circuit boards for precious metal recovery, etc.), which are then sold into commodity markets for use in new industrial processes.

Covered electronic items received from Michigan consumers either go directly to an MRM recycler, as in the mailback program, or are consolidated at a collection location and shipped to an electronics recycler. MRM recyclers process all electronics domestically using no prison labor. The recyclers break electronics into commodities. All of our recyclers sort Cathode Ray Tube glass and send the CRT glass to CRT glass manufacturers for remanufacture into new CRTs. Metals are separated and sent to metals recycling processes; precious metals and certain batteries are sent to precious metal processors in Europe. Plastics are shredded and sent for use in new plastic processing. All batteries and mercury lamps are removed and sent off for further processing.

More information on MRM's requirements for recycling vendors can be found on the MRM website.
